PVC COLUMN WRAPS

**PATENTED**

# **SNAP-TITE® PVC COLUMN WRAP**

The market's only PVC Column Wrap that requires no PVC glue or adhesive. The product simply snaps together for the perfect column wrap!

- Patented design for quick assembly
- Wood Grain and Smooth Textured designs available
- Built with cellular PVC to ensure longevity
- Matches home's exterior trim for a modern, uniform look
- Reduce installation time by up to 80%!
- No PVC Glue needed
- No reason to return next day to remove bungees & perform final touch up

**Snap-Tite® is available in the following two textures:**

**Smooth Textured**

**Wood Grain**

**BEFORE**

**AFTER**

## The Problem

In 2022, A newly-constructed retail store had a list of projects that needed to be completed, including finishing up the exterior to become inviting to the public. They, unfortunately, had precious little time remaining before the grand opening. How could they save time and have everything ready by opening day?

## The Solution

Wooden support beams were up, but they needed to be covered to match the aesthetic of the building. Column wraps historically take a while to be installed due to the amount of cutting, mitering, gluing, setting, etc. that needs to take place. Instead, the store turned toward Superior Aluminum's brand new Snap-Tite® PVC Columns as a time-saving alternative that did not sacrifice the desired style.

Unlike other PVC Wrap Around Column solutions, Superior's Snap-Tite® PVC

Columns' patented design requires none of the tedious tasks associated with standard column wraps. By simply being able to cut the staves to size and snap them around the wooden supports, the contractor saved over 30 minutes per column. In addition, no second trip was needed to take off straps or clean up excess glue. When all seven columns are considered, the contractor was able to free up an entire half day for one of their employees to be able to complete other punch list items.

## The Result

The time saved utilizing Snap-Tite® columns was able to be reinvested elsewhere, allowing the final punch list to be easily cleared in time and the store to have a successful opening.

The average time to assemble a column dropped from 45 minutes to 9 minutes with the new Snap-Tite® PVC columns.

**That's a time savings of 80%!**
